

C M S**TAPE - TOP**

Turntable Tape Transport

This revolutionary new design concept combines the quality features of the normal transport with the simplicity of the continuous loop cartridge in what is the most versatile...high fidelity...low cost...self-contained...tape mechanism available to business and industry....

...AND...the motivating power to drive this unique mechanism is derived from any manual phonograph or turntable...

The Tape-Top is a professional quality, smooth performing tape mechanism with an unusually large capacity (10 1/2" reel), extremely simple operation, exceptionally good flutter and wow characteristics, a wide variety of head combinations and is available with a mechanical track selector.

By simply placing the Tape-Top on a turntable and inserting a single plug the capstan is engaged, the tape placed in motion and the head output is available for any appropriate pre-amp or amplifier.

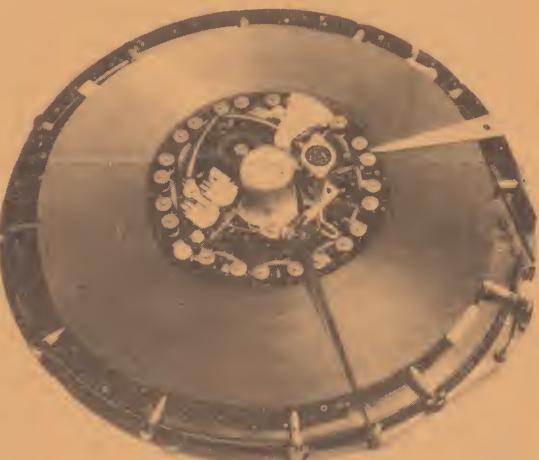

In operation the Tape-Top is completely automatic and is capable of handling program material of extremely great length:

TYPICAL CAPACITY: 3200' of Tape
